Title: A Plastic Ocean

Caption:

These are our before and after pictures of the challenge our oceans face. The slime we made represents the sea. The duck symbolizes the sea life that is affected by our harmful litter, and the fact that there is only one duck represents that our waste will kill off the animals. The dried slime portrays litter and rubbish. The plastic on the camera lens shows an ocean dominated by plastic. The message we are sending is that if we do not stop litter going into our ocean this is what it will look like in approximately 12 years.
