Title: The Earth Through The Eyes of the Sea

THE EARTH THROUGH THE EYES OF THE SEA

My photograph represents how the ocean is completely trapped under a layer of plastic. The idea of this image is to give the viewer a beautiful landscape to look at, but to have it blocked by a plastic bottle; similarly to how the ocean is getting suffocated by plastic. If we want to help the ocean breathe again, we can do multiple things, like eliminate plastic bottles and/or use metal straws. I hope this image inspires you and our entire community to make a change so that the future of the ocean isn't like this.
