

TRAPPED

Protect our plants and our water before we end up trapped.

This photo demonstrates, not only the importance of taking care of New Zealand's delicate flora but also the need to keep our ocean plastic-free to avoid dirty water. If we don't, we'll end up with a world dominated by plastic. Although our planet is feeling the pressure, there is still time to turn things around! There is hope for us yet but everyone needs to do their part. We could do as little as spreading the word, or as big as organising a strike. We must stop neglecting our earth, and start protecting it! Our generation needs to be part of the solution and not part of the pollution.

Protect our plants and our water before we end up trapped.
